[Portfolio](#)

I'm Hoang - a Product Designer drawn to the space between complexity and clarity, where every screen is a negotiation between user behaviors, business logic, and human intuition. Over the past four years, I've worked across product experiences that required thoughtful systems, intuitive flows and attention to how people navigate digital products. I'm particularly interested in how research, storytelling, and emerging AI tools can work together to turn complicated problems into experiences that feel almost effortless.

PROFESSIONAL EXPERIENCE

Product Designer at GemCommerce (09/2024 - Present)

SaaS - Global Product Company that helps people sell better online

- **Project "Element Settings 7.5"**: Audited and resolved UI inconsistencies across element settings panels in the GemPages editor, proposing a unified pattern to bring coherence across all element types. Took ownership of post-launch iterations based on usability testing with real users. Shipped redesigned Hover Settings and Item Management Settings.
- **Project "GemPages Mobile"**: Redesigning the app dashboard and editor to meet Shopify's Built for Shopify (BFS) mobile compliance requirements. Worked closely with engineers to adapt desktop interactions for touch, and leveraged AI tools to accelerate the BFS audit process. Shipped a new mobile editing mechanism and fully responsive dashboard layout.
- **Project "Sales Funnels Redesign "**: Redesigning the dashboard to surface revenue metrics upfront, introduced funnel visualization to illustrate conversion impact, and added a dedicated funnel report section. Received positive feedback from initial usability testing.
- **Learning Experience**: Gained deeper expertise in SaaS product design across editor UI and analytics dashboards. Strengthened skills in design systems, engineering collaboration, and translating research into product improvements. Developed practical experience using AI tools to support design research and compliance auditing.

UX/UI Designer at Magenest (08/2023 - 08/2024)

eCommerce - Digital Transformation solution providers

- **Project "Viettel Construction - AIO Homes"**: Designed a website experience balancing functionality and visual clarity, aligned with brand guidelines shared across AIOsmart and AIOService.
- **Project "Magenest Store Icon Design"**: Enhanced the visual appeal of the storefront by redesigning over 80+ icons. This resulted in a more attractive e-commerce site, with 94% of survey respondents indicating a preference for the new design.
- **Learning Experience**: Acquired the ability to collaborate effectively in a cross-functional team. Gained insights into the process of product creation. Learned new skills in project management and execution in CRM, ERP, E-commerce project.

UX/UI Designer at Capi Product (07/2022 - 06/2023)

Design Outsourcing Agency

- **Project "Capi Product Design System"**: Completed a design system, laying the foundation with visual direction and basic components. This project accelerated our pace by providing guidelines and basic components for other website projects.
- **Project "xTrading"**: Designed the web app, mobile app, and landing page for a crypto investment platform. Built a design system covering style and components in both light and dark mode.
